

Audit of smart contract DEGREE

revision 1 dated 23.11.2021

Summary

Audit of smart contract DEGREE	1
Summary	2
Brief information	3
Information	3
General conclusion	3
Liability disclaimer	3
Aggregated data	4
Received data	4
A. Errors	5
B. Warnings	6
1. Owner's mint availability	6
C. Notice	7
D. Remarks	8
Application. Error classification	9
Application. Digital bytecode print	10
Application. Signature of the audit report	11

Brief information

Project: [DEGREE](#)

Network: TRON

Compiler version: 0.5.12

Optimization: Enabled

Audit date: 23.11.2021

Information

The contract code was reviewed and analysed for vulnerabilities, logical errors and developer exit scams possibilities. This work was carried out concerning the project source code and documentation provided by the customer.

Customer did not provide a separate technical document, the audit was carried out only on the source code

General conclusion

As a result of the audit, no errors were found that affect the security of users' funds on the contract. No obvious signs of an exit scam were found.

Telescr.in guarantee the safety and performance of the contract DEGREE CRYPTO TOKEN

Liability disclaimer

The telescr.in team within this audit framework is not responsible for the developers or third parties' actions on the platforms associated with this project (websites, mobile applications, and so on). The audit confirms and guarantees only the smart contract correct functioning in the revision provided by the project developers.

[Confirmed by digital signature](#)

Aggregated data

The Contract analysis was performed using the following methods:

- Static analysis
 - Checking the code for common errors leading to the most common vulnerabilities
- Dynamic analysis
 - The Contract launching and carrying out the attacks various kinds to identify vulnerabilities
- Code Review

Received data

Recommendation	Type	Priority	Occurrence probability	Line of error
Owner's mint availability	warning	low	low	159

A. Errors

Not found.

B. Warnings

1. Owner's mint availability

The Owner is able to mint tokens at any moment up to maxSupply amount.

C. Notice

Not found.

D. Remarks

Not found.

Application. Error classification

Priority	
informational	This question is not directly related to functionality but may be important to understand.
low	This question has nothing to do with security, but it can affect some behavior in unexpected ways.
medium	The problem affects some functionality but does not result in an economically significant user funds loss.
high	This issue can result in the user funds loss.
Probability	
low	It is unlikely that the system is in a state in which an error could occur or could be caused by any party.
medium	This problem may likely arise or be caused by some party.
high	It is highly likely that this problem could arise or could be exploited by some parties.

Application. Digital bytecode print

The audit was carried out for the code certain version on the compiler version 0.5.12 with the optimization enabled.

To check the contract bytecode for identity to the one that was analyzed during the audit, you must:

1. Get contract bytecode (in any block explorer)
2. [Get SHA1 from bytecode string](#)
3. Compare with reference in this report

Sha1 from bytecode:

0bff92427fd7917f9c1e71cd88c84328a1d4509b

Sha1 from bytecode (non-metadata):

05f4fbcc4c3bf3ea5ffcba1f46562b702b08b4da

Contract address:

[TUKxxRkFi21d6KnqUi7aNsbA2So91xMDFG](#)
